TW1322

GPS-L1/GLONASS-G1 Antenna

Frequency Coverage: GPS L1 | GLONASS G1

Overview

The TW1322 is a high performance OEM GNSS antenna covering the GPS-L1, GLONASS-G1 and SBAS (WAAS, EGNOS & MSAS) frequency band (1575 to 1606 MHz). It features a patch element with 40% wider bandwidth than previously available in this format. Unlike its competitors, both GPS-L1 and GLONASS signals are included in the 1 dB RHCP received power bandwidth.

The TW1322 has a two stage low-noise amplifier (LNA) with a mid-section SAW. A tight pre-filter on the TW1322 to protect against saturation by high-level sub-harmonics and L-Band signals. The built-in 35 mm circular ground plane should ideally be augmented with a local system ground plane or reflecting surface (DC connection not required).

OEM antennas are easily detuned by the local environment. Calian offers custom tuning services for optimized integration into OEM end-user modules.

Applications

- Embedded OEM applications
- Precision agriculture, mining, and construction
- Law enforcement and public safety
- Avionics
- Fleet management and asset tracking

Features

- 1 dB bandwidth 1575 MHz 1606 MHz
- 4 dB Axial Ratio @ 1590 MHz, 8 db over B/W
- High-rejection SAW filter
- LNA gain: 26 dB typ.
- Low current (9 mA typ.)
- ESD circuit protection (15 kV)
- Wide Supply voltage: fixed 2.5V to 16V

Benefits

- Great multipath rejection
- Increase system accuracy
- Excellent signal-to-noise ratio
- Great out-of-band signal rejection
- · Compact form factor
- · RoHS compliant

About Calian: With global headquarters and manufacturing in Ottawa, Canada, Calian is a leading manufacturer of high-precision antennas and components for Global Navigation Satellite System (GNSS) applications. Calian's mission is to support the needs of a new generation of positioning systems by delivering unprecedented antenna precision at competitive prices. Learn more at www.calian.com

GPS-L1/GLONASS-G1 Antenna

Frequency Coverage: GPS L1 | GLONASS G1

Antenna - Measured with a 100 mm ground plane
